

LLC-3 Brightness Adjustable White Light Source

- *Adjustable brightness*
- *Housing and power supply provided*
- *Compact structure*

This brightness adjustable lamp is designed for use in physics labs at universities and colleges. A high brightness Bromine-Tungsten light bulb provides incoherent white light with a wide wavelength range. The brightness of this lamp can be controlled with a knob on the power supply. A piece of ground glass or iris diaphragm can be placed at the output window using the attached spring clip to create an area light source or a spot light source.

Specifications

Working Voltage	12 V
Maximum Power	30 W
